# Đinh Việt Hoàng

**Backend Developer Intern** 

## **Education**

**FPT University** 

DEC 2022 - Now

Software Engineering

6th - semester student (6/9)

**GPA**: 8.4

## **Profile**

- 🗂 October 15, 2004
- Male
- 0367-862-734
- viethoang3614@gmail.com
- https://github.com/viethoang1520
- Thu Duc, HCM

# **Technical Skills**

#### **Backend**

· Programming Languages:

C, Java

JavaScript (2 years),

TypeScript (6 months),

Python, Go

· Framework:

NodeJS (2 years)

NestJS (6 months)

ReactJS (6 months)

- · Database: MySQL, MongoDB
- · Version Control: Git/Github/GitLab
- Others: Docker, AI Agent, DevOps, CI/CD

# **Objective**

I'm enthusiastic about new opportunities and challenges that allow me to expand my knowledge of software development.

# Work experience

#### **NodeJS Intern**

Jan 1st - 4 months

**FPT Software** 

- Led backend development team, reviewing and merging code from other interns
- Mentored junior interns on NodeJS best practices and development workflows
- Developed core functionality and implemented critical backend features
- Implemented an Al-powered chatbot using multi-agent architecture
- Enhanced team productivity through technical leadership and knowledge sharing

Heally August 2024 - 1 month

Github: https://github.com/viethoang1520/heally

- Role: Backend developer (2 members)
- Technology Used: NodeJS, ReactJS, WebSocket, MongoDB
- **Description**: Heally is a website that helps people connect and chat with strangers randomly. The system uses an algorithm to randomly match users based on the preferred gender they select during registration. The idea came from the need for emotional support during tough times, like after a breakup or dealing with life stress.

# **FPT Mentor**

September 1 - 3 months

Github: https://github.com/klong-dev/swp\_group3\_be.git

- Role: Backend developer (5 members)
- Technology Used: NodeJS, ReactJS
- **Description**: A web platform connecting 5th-semester students with senior mentors to support SWP391 projects. The system allows students to search for mentors, book mentoring sessions, and apply to become mentors themselves.
- My role is to develop and maintain admin-related APIs, set up project architecture, and implement APIs for managing students, items, notifications, and semesters.

#### WeCook

May 2024 - 3 months

Github: https://github.com/viethoang1520/wecook

- Role: Fullstack developer ( 1 member )
- Technology Used: Django, ReactJS, MongoDB, Antd Al Component( HuggingFace, OpenAl )
- Description: The "WeCook" is designed to be a smart cooking assistant that extracts ingredients and recipe based on video input.

## **English**

- · Good at 4 English skills
- · Ability to read and comprehend documents
- · Proficiency in English communication
- Used to teach English for remote students

#### **Frontend**

- ReactJS
- · HTML/ CSS
- · Boostrap, Antd

# **Certifications**

#### 2023

**Coursera:** Web Design for Everybody: Basics of Web Development & Coding

#### 2023

Coursera: Object Oriented Programming in Java

It aims to provide users with ingredient-based recipe suggestions, an **AI Chatbot**red recipe generator, and step-by-step cooking guidance

Github: https://github.com/viethoang1520/chatbot-api

- Role: Backend developer (1 member)
- · Technology Used: Swarm Al Multi Agent, Flask, PostgreSQL
- Description: A Python-based conversational AI using OpenAI's Swarm framework, PostgreSQL, and Docker. Features a multi-agent architecture with specialized claim handlers, enabling users to create, retrieve, and manage claims through natural language interaction.

# **Activities**

Host

Dec 2022 - Aug 2024

ELF Speaking Club (English Language at FPT University)

Teaching English online to students in remote areas.

## **Honors & Awards**

2022 Saigon in FPTer's Eyes Prize (English competition)

2024 Honorable student of the semester - Spring 2024 - GPA: 9.2
